Our Method

The different elements which make up the Wall Street English Method

Learning to Communicate

When Students say that they want to learn English, they really mean they want to understand and speak in English. At Wall Street English we recognize this. Communication is at the heart of our method.

English-only Environment

An English-speaking environment maximizes the time Students have to practice the language they are learning and gives them the opportunity to use and hear the language outside the classroom in natural conversation.

Flexible Learning

Students can access their course 24 hours a day, 7 days a week, at a time that suits their schedule. Students can study their course where they want, at home, at work, or even on vacation. They can then schedule a class on a day and at a time that suits them best.

Engagement & Motivation

At Wall Street English we know that Students want learning to be enjoyable and you need the support of a company that cares about your progress. We do everything we can to make sure learning is an enjoyable and engaging experience.

Personalized Attention & Support

Students will always need support to learn and will need help during their learning journey. That's why at Wall Street English we ensure we offer each Student a superior support system to make sure they keep on learning to reach their life goals.

Guaranteed Progress

At Wall Street English Students learn by steps in a structured, supportive environment. As you achieve more and more learning objectives, you have a detailed understanding of what you have learned and how you are progressing.

Proven Method

We have a proven alignment of our syllabus with Global English Language Teaching (ELT) Standards - the Common European Framework of Reference (CEFR).

At Wall Street English you know exactly what level of English you have when you start the course and when you finish your contract. We guarantee if you follow the Method, you will achieve that level.
